Experience

Carter Store Project
October - November 2023

Managed the backend database system for Carter Store, a clothing retailer, involving the following tasks:

- Business Requirements: Defined the project's scope and objectives, focusing on user authentication, order processing, and product management.
- Logical DB Design (Table Design): Designed the database schema, including tables and relationships.
- SQL Statements: Developed and optimized SQL queries for data manipulation and retrieval.
- Data Dictionary: Created a comprehensive data dictionary to document database structure and definitions.
- DDL Script: Authored DDL scripts for creating and managing the database schema.
- Data Export: Exported data using INSERT statements to populate the database.

PROJECT2-SEC-2-Mairuu : POS System
February- April 2024

Developed a POS system for a dim sum restaurant using Vue.js for frontend development and a simulated JSON-based database for backend data management. Key contributions included:

- Frontend Development: Designed and implemented user interfaces for Home, Customer Order, Employee Operations, and Admin Management.
- Data Management: Managed and analyzed data for orders, menu items, and table reservations, including table availability and menu updates.
- Data Processing: Enabled multi-language support and integrated customer interactions with backend data.
- Collaboration: Worked with team members to ensure seamless integration of frontend and backend components.

Project: IT-Bangmod Kradan Kanban
April - May 2024

Developed a Kanban Task Board system for the IT-Bangmod Kradan project using Agile and Scrum methodologies. The project involved:

- Frontend: Designed and implemented the user interface using Vue.js, HTML, CSS, and JavaScript.
- Backend: Developed server-side logic and APIs using Spring Boot.
- Database: Designed and managed the database schema and operations.
- DevOps: Configured Docker, Dockerfile, and docker-compose.yml on Linux and Ubuntu. Set up a proxy for deployment and server communication.

Education

High School
2015 - 2021

- Chonburi Sukkhabot School

University
2022 - Present

- King Mongkut's University of Technology Thonburi

Technical Skills

- Data Cleaning, Preparation & Transformation
- Data Analysis (Spreadsheets, SQL, R)
- Data Visualization (Tableau)
- Python (Basic Knowledge)
- MySQL
- Java (Spring Boot)

Soft Skills

- Critical Thinking
- Problem-Solving
- Communication
- Attention to Detail
- Time Management
- Collaboration
- AdaptabilityData-Driven Decision Making
- Project Management (Data Analysis Projects)
